

5G & Tele-Health in the Digital Decade

Webinar "Tele-Health Solutions Powered by 5G"

Cyril Krykwinski

Project Officer

European Commission

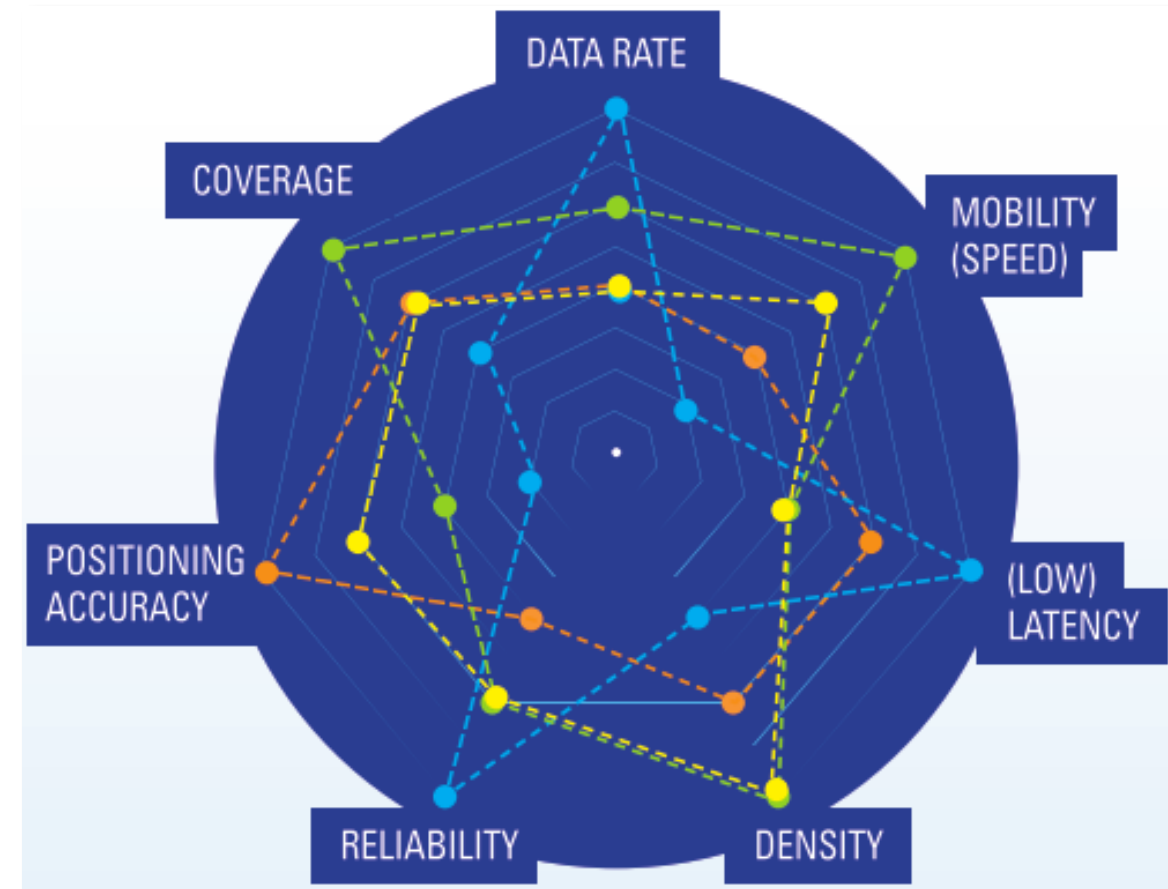

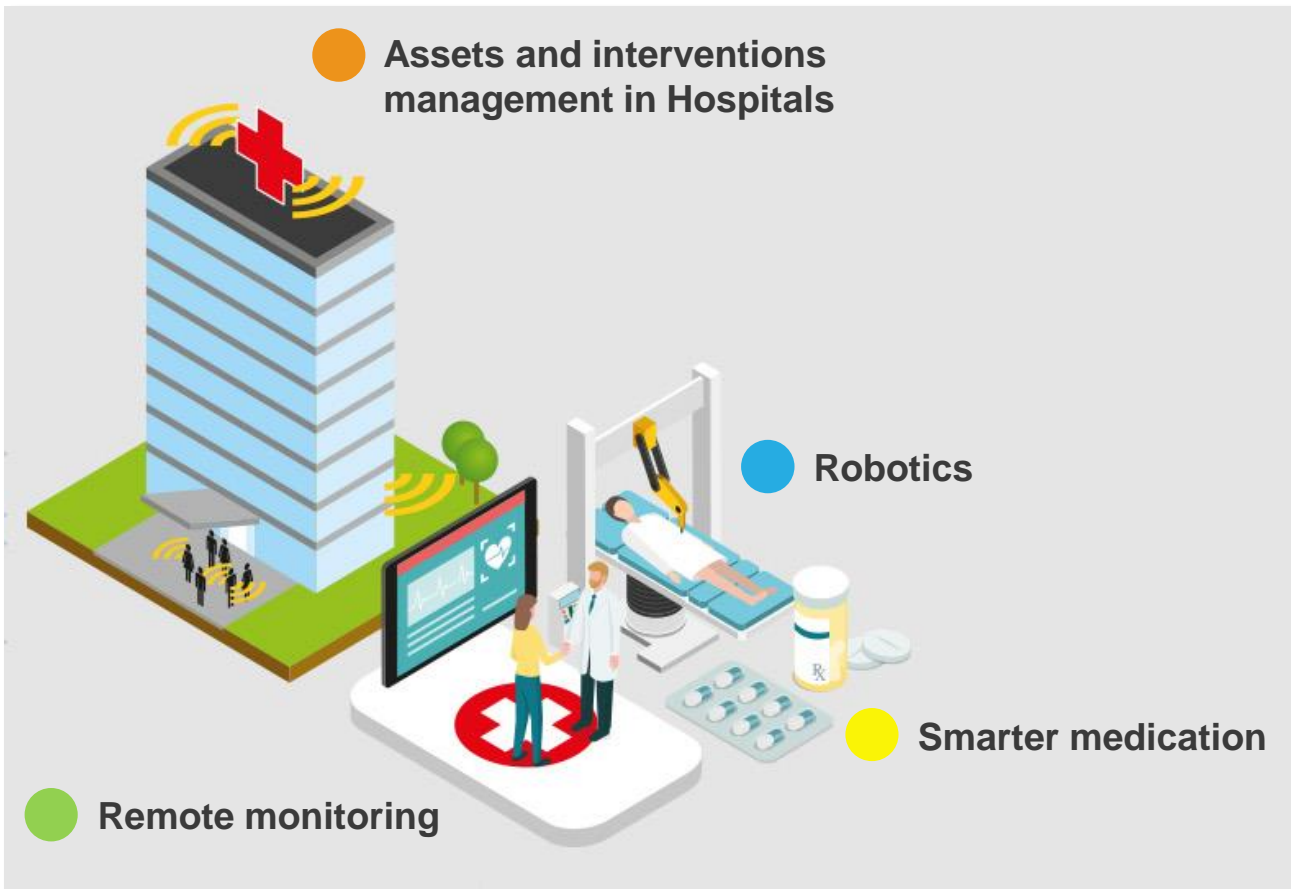

DG CONNECT - Future Connectivity Systems

eHealth is changing healthcare paradigm

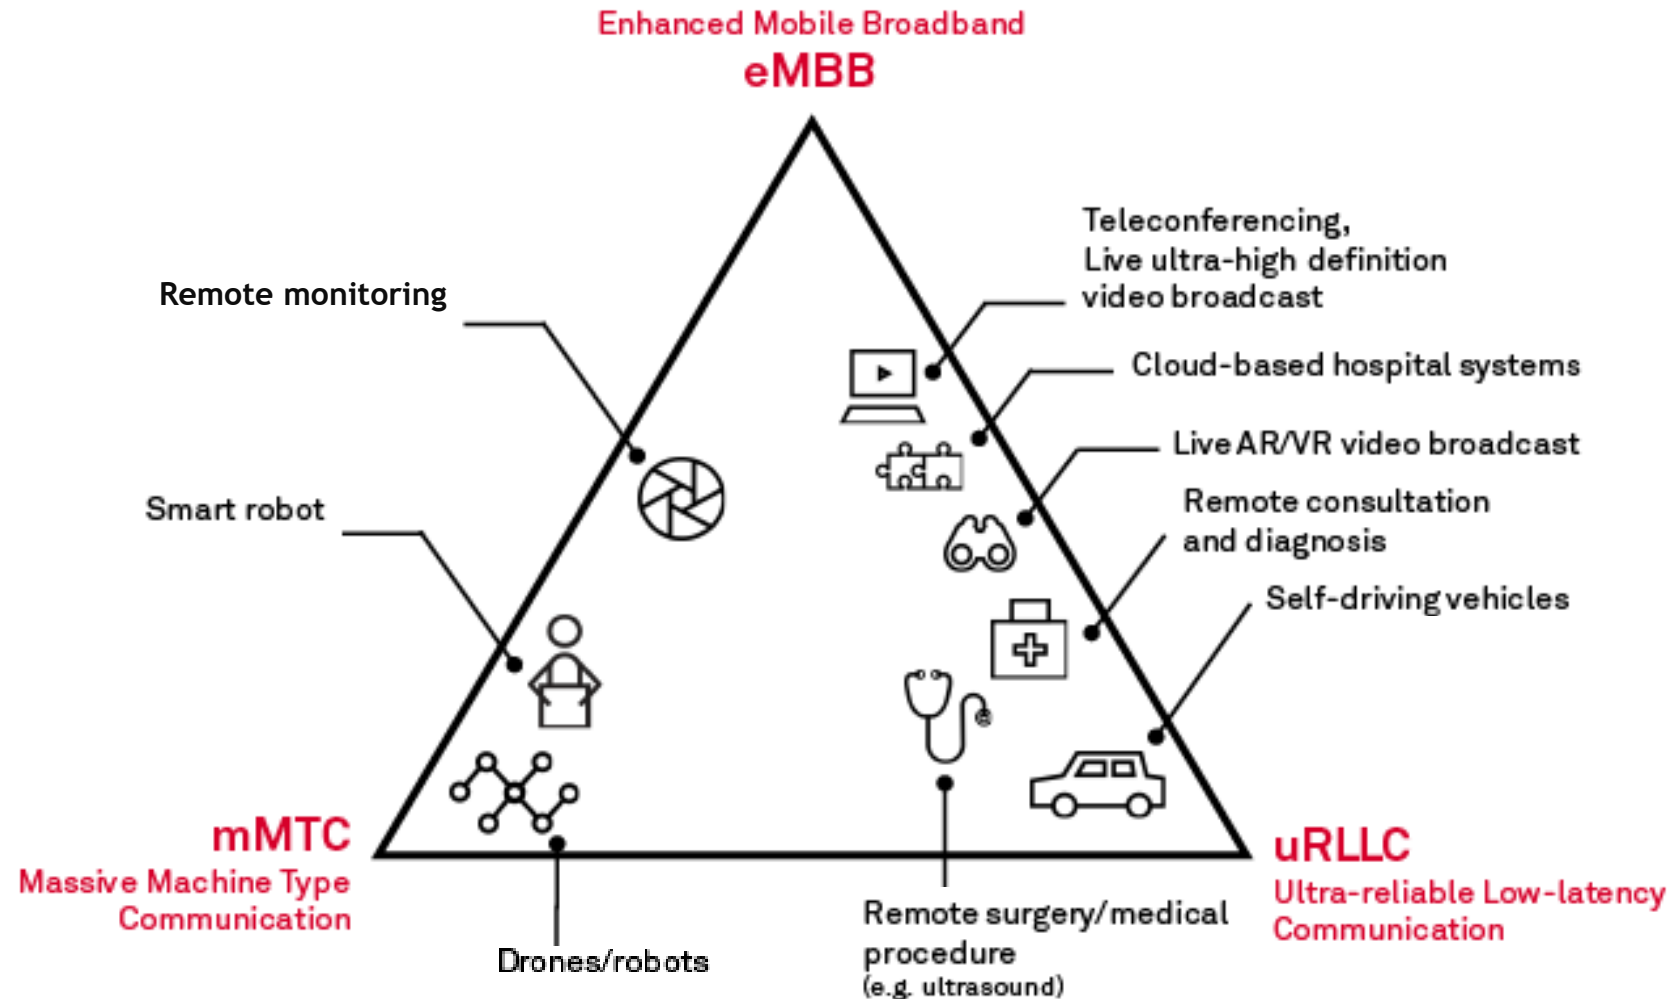

Convergence of medicine and
technology for a
Personalized, Predictive,
Preventive, and Participatory
medicine

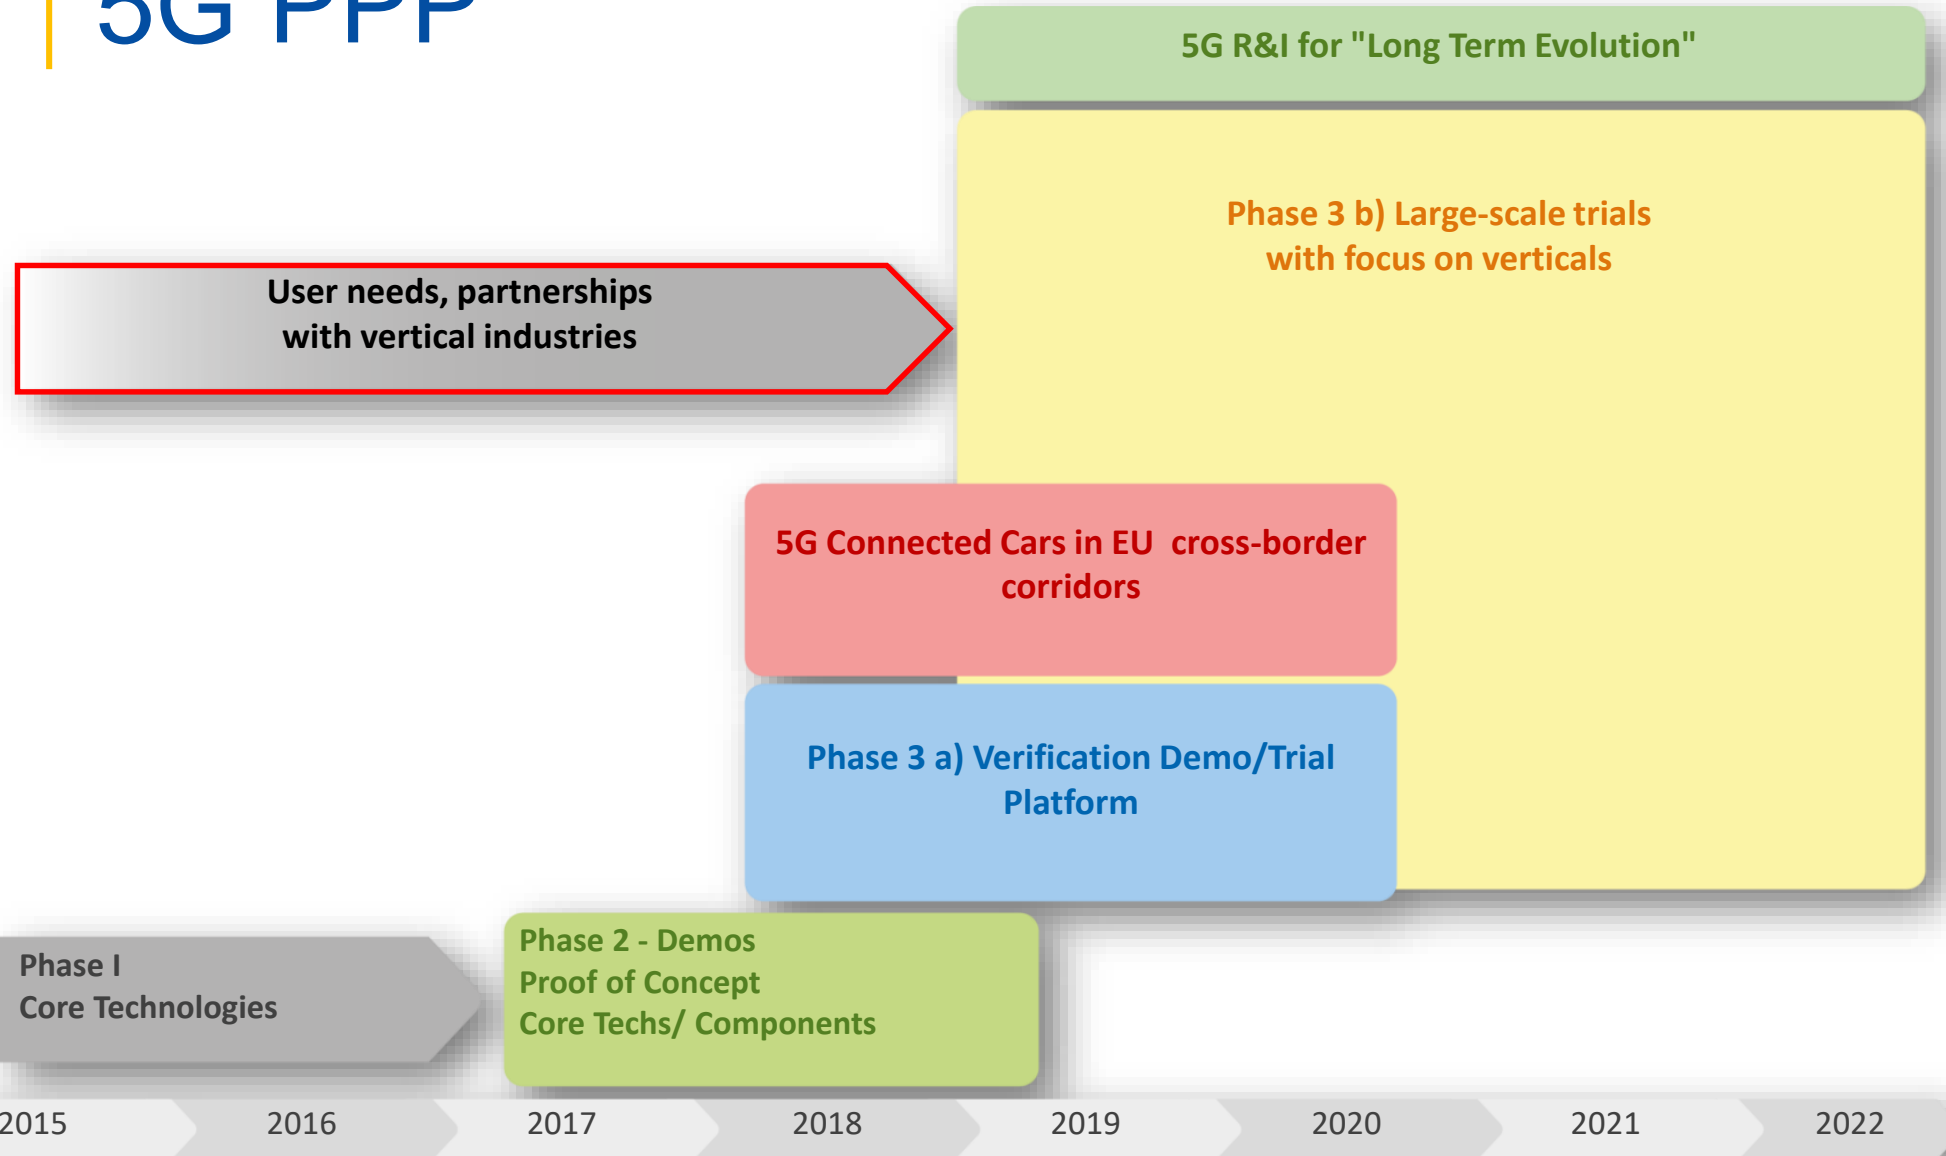

5G requirements from eHealth use cases

5G opportunities for eHealth use cases

5G PPP

5G/6G Action Plan | Progress

Category	Specific Goals in 5G Action Plan (5GAP)*	Status
1) 5G targets & scheduled EU Alignment	1) Common EU timetable for deployment (2020 & 2025); '5G-ready' cities; support for field tests	☺ 25 MS with 5G commercial service (>250 5G cities) ☺ 12 5G cross-border corridors identified ☺ 14 MS have a 5G Roadmap
2) Radio Spectrum	2) Band identification ('pioneer' bands & beyond) 3) Common authorisation models (> 24 Hz)	☺ Pioneer bands identified and harmonised ☹ Only 45.8% of 5G pioneer spectrum assigned ☹ 26/28GHz delay
3) Dense networks	4) Metrics for fibre deployment (backhaul) Administrative best practice for small cells	☺ Small cell implementing act adopted ☹ Number of new cell deployments limited
4) Tech. standards	5) Basic standards by end 2019 Standards for vertical use cases	☺ Rel. 16 adopted (5G enhancements for verticals) ☹ Work still needed on vertical capability in Rel. 17 (QoS)
5) Service innovation	6) Industrial engagement on joint trials ('trial roadmaps') for verticals 7) Public sector as a primary user (PPDR) 8) Venture capital to foster innovation	☺ 200+ registered trials ☹ Industry trial strategy with flagship projects in 5G-PPP phase 3 ☹ Public use cases still being discussed (PPDR) ☺ Concept for 5G Venture Capital initiative with EIB (study finalised)

* 5G for Europe: An Action Plan - COM(2016) 588

5G and COVID-19

Increasingly critical nature of digital services

- Technology sovereignty is at the heart of 5G and later 6G
- Gaining even further significance in light of COVID-19
- Europe's capacity to set evolving 5G and later 6G standards
- Role of equipment suppliers of strategic importance

Addressing COVID-19

- Communication networks critical especially in times of crisis
- 5G/6G for remote healthcare as well as rapid health crisis response (e.g. tracing apps)
- Economic recovery through major infrastructure investment programmes:
 - Key instrument for rapid economic recovery
 - Major opportunities for SMEs as part of new 5G-based digital ecosystems

Digital Decade

Skills

ICT Specialists: 20 million + Gender convergence

Basic Digital Skills: min 80% of population

Government

Key Public Services: 100% online

e-Health: 100% availability medical records

Digital Identity: 80% citizens using digital ID

Business

Tech up-take: 75% of EU companies using Cloud/AI/Big Data

Innovators: grow scale ups & finance to double EU Unicorns

Late adopters: more than 90% of European SMEs reach at least a basic level of digital intensity

Infrastructures

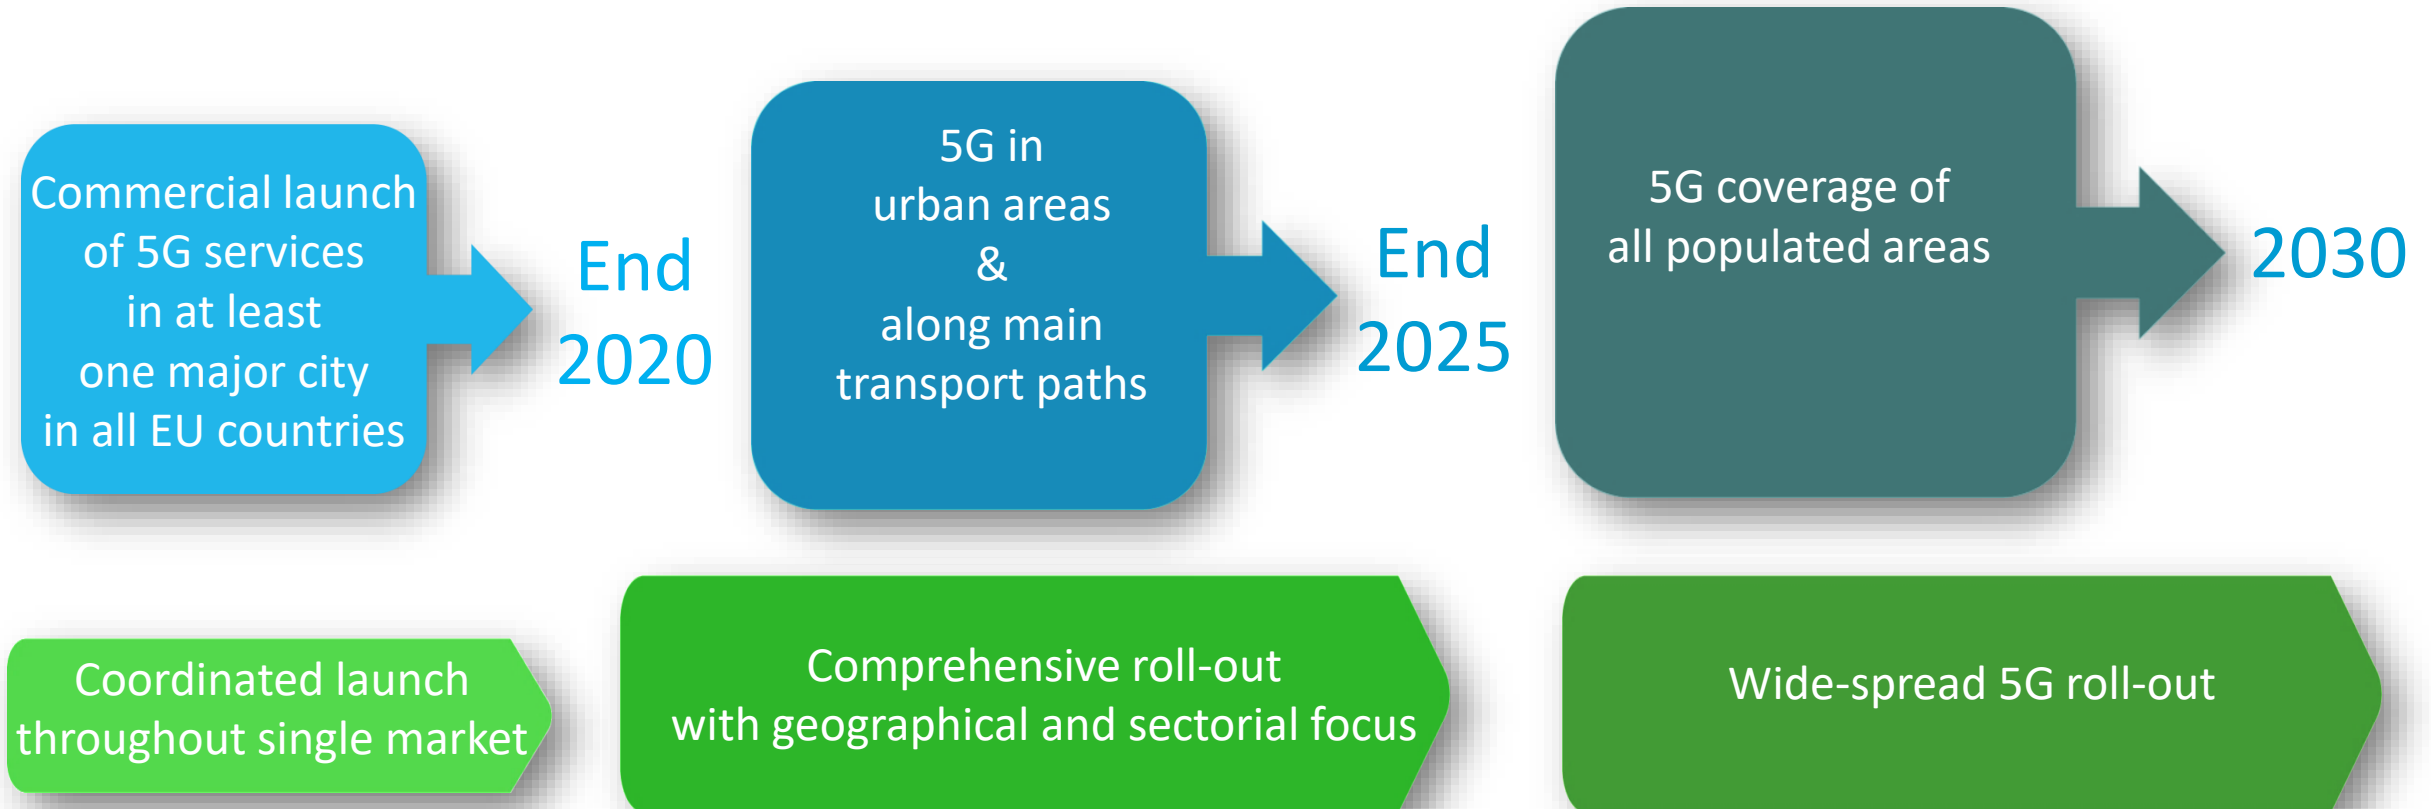

Connectivity: Gigabit for everyone, 5G in all populated areas

Cutting edge Semiconductors: double EU share in global production

Data – Edge & Cloud: 10,000 climate neutral highly secure edge nodes

Computing: first computer with quantum acceleration

5G targets in the Digital Decade

5G/6G in digital decade | Scope

New EU ambition

- 5G for recovery
- Update deployment objectives
- Cybersecurity toolbox
- Embrace fixed/mobile synergy
- Common deployment indicators
- Green Deal

Mobilising investments

- Infrastructure: CEF, RRF, Invest EU
- Addressing market failures
- Venture Capital: demand pull

New topics

- Context: Recovery and Resilience
- Building 5G “lead markets”: transport, i4.0, health,...
- Expanding 5G spectrum roadmap
- Pan-EU approach to spectrum conditions
- New deployment models and supply market trends
- Strategic autonomy and cybersecurity (5G+6G)
- Low-energy operations / green applications
- Stronger stakeholder engagement through Smart Networks and Services Partnership (road to 6G)

Beyond 5G / Towards 6G

- Strong competition for industrial leadership
- B5G/6G initiatives started in other regions of the world (US, Japan, China, India)
- It is important for the EU to gain / maintain a leading role.
- Our plans : **6G Smart Networks and Services**
 - € 900 millions / 6 years under Horizon Europe matched by industry
- Importance of synergies, multiple Member States initiatives (Finland, Germany...)

Smart Networks and Services Strategic areas

Applications

- Seizing the “Trillion €” opportunity (McKinsey) in vertical industries
- New types of applications

Industrial leadership

- Starting 6G race: an opportunity to consolidate EU lead

Societal, Sustainable Development Goals

- Smart connectivity underpinning key societal issues

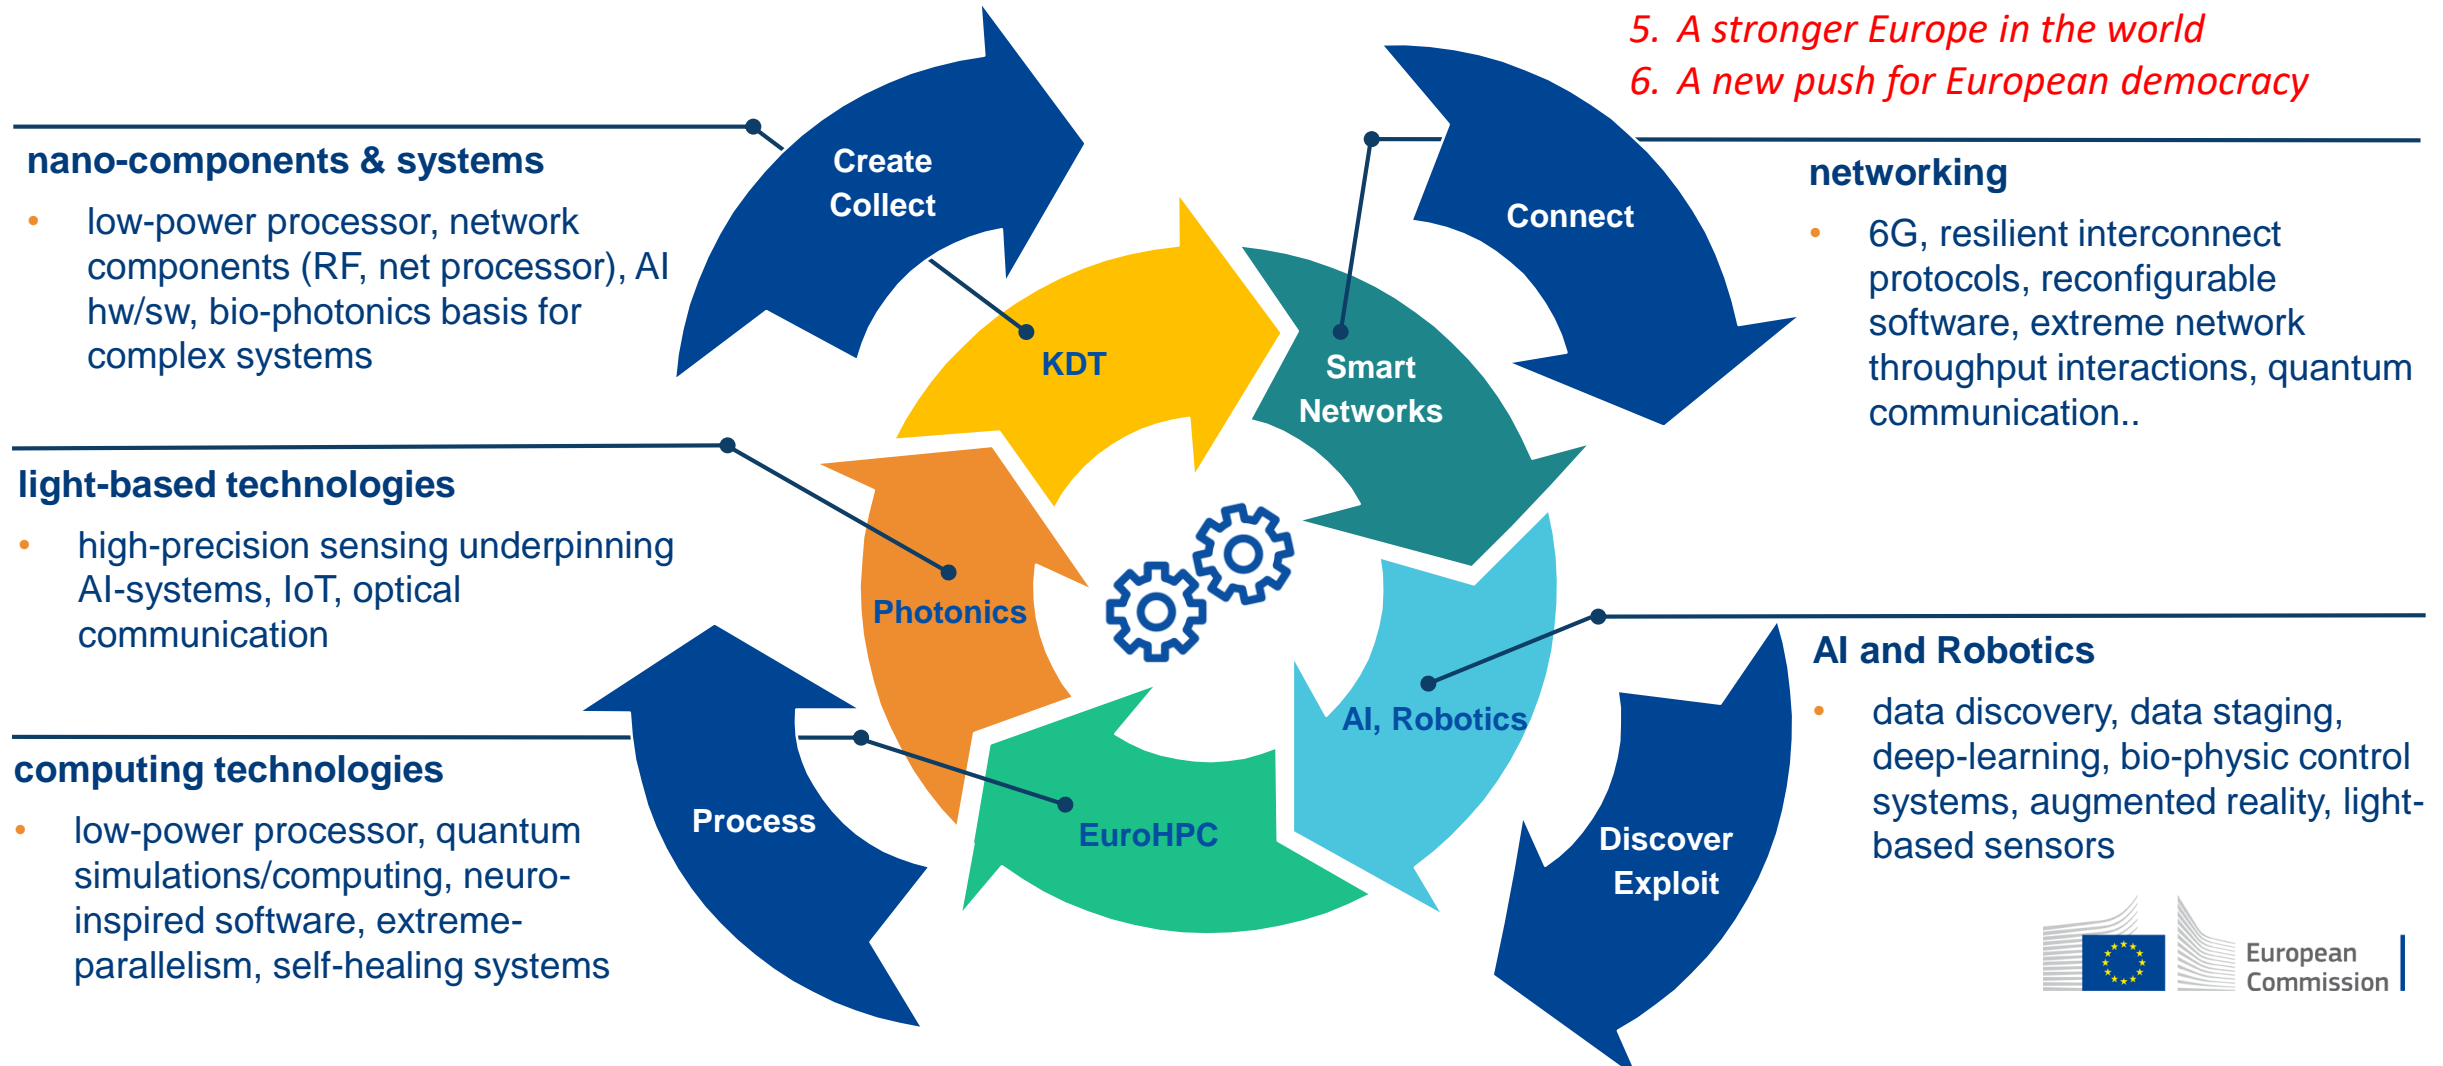

Sovereignty/ Open Strategic Autonomy

- value chain approach for a comprehensive EU supply side
- From components to cloud services

Partnership: a response to the magnitude of the challenges

Serving new Policy agenda with Digital Partnerships (cluster 4)

1. *A European Green Deal*
2. *An economy that works for people*
3. *A Europe fit for the digital age*
4. *Protecting our European way of life*
5. *A stronger Europe in the world*
6. *A new push for European democracy*

The Smart Networks and Services Partnership

HORIZON EUROPE

Remaining and new challenges:

- Higher capacity – Zero touch networks
- Spectrum challenges (TeraHertz, flexible use)
- Advanced Radio processing
- Ultra high security
- Ultra low energy/EMF

Opportunities and needs:

- Smart devices, (edge) Networks, Data Processing
- New classes of applications (“Internet of Senses”)
- Verticals, requirements beyond 5G
- Value Chain perspective

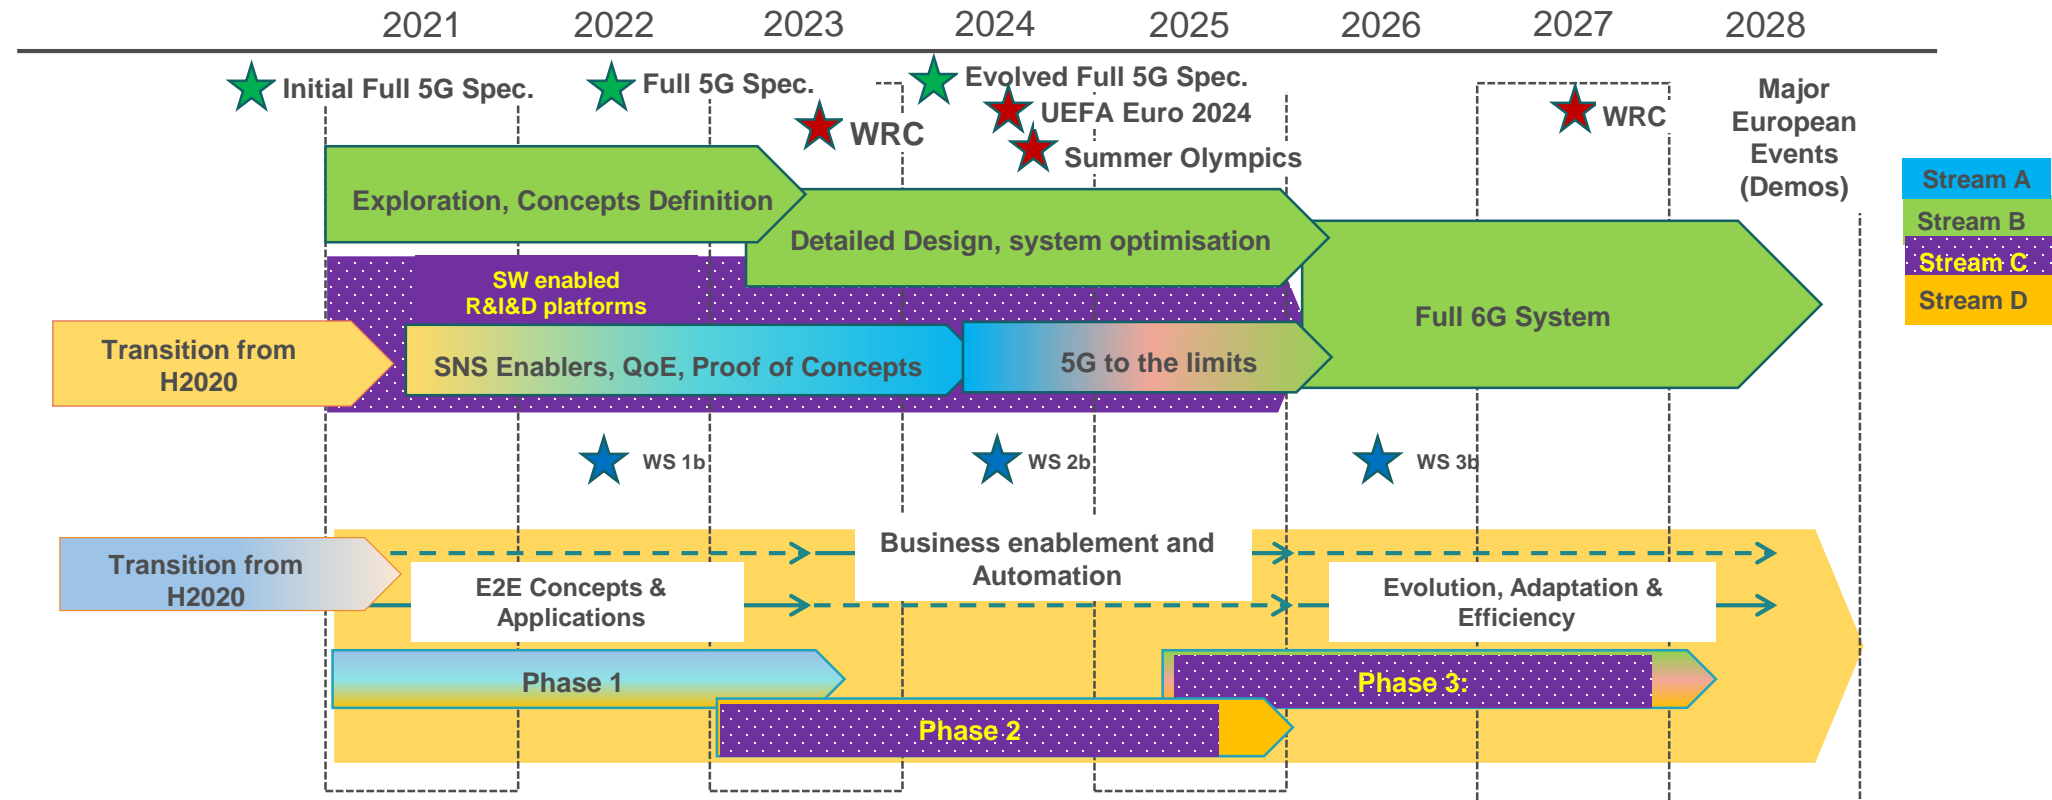

DEP & CEF

Deployment and capacity building:

- 5G corridor deployment for CAM
- Smart communities/ socio-economic drivers
- AI/Cybersecurity /blockchain enabled by smart networks

SNS Roadmap

★ Workshop with EU Partnerships - IAFA

Thank you
